

EntraLight™ Sliding Gates

The basic solution for entrances

Gunnebo Perimeter Protection dedicates all of its expertise to development, production and service. All products are therefore state-of-the-art and are tailored to our customers' needs. Detailed research of the market guides us towards innovations and this was the route taken when developing EntraLight™. The electronically controlled EntraLight™ sliding gate is a low-cost alternative to the premium range of GPP gates.

EntraLight™ gates combine functionality with high cost-effectiveness. Their main features are standard dimensions and the distinctiveness of the gate infill. EntraLight™ Cantilevered Sliding gates are available for clear widths up to 8 m. Silver-coloured eloxal and various RAL-based coatings extend the design possibilities. Given their lightweight design, EntraLight™ sliding gate systems win over customers by offering an optimum price/

performance ratio without any compromise having to be made in the current heightened security requirements.

The distinctive design is just as impressive as the smooth way in which the gate opens and closes. The EntraLight™ gates do of course satisfy all the requirements and standards applicable to power-operated gates. Fitting is very simple, as you would expect from GPP. The gates are pre-fabricated in our factory and are then subjected to extensive functions tests.

EntraLight™ Sliding Gates

The basic solution for entrances

Basic solution for gateways

As a modern design for self-supporting sliding gate systems, EntraLight™ offers a number of benefits:

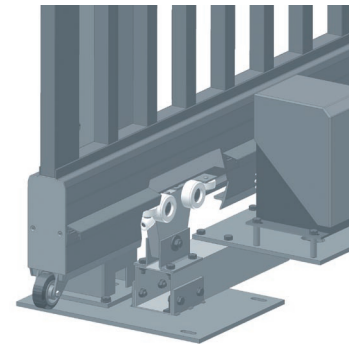

- EntraLight™ is fitted with tried and tested drive technology
- and is a state-of-the-art development
- Its verified strict safety standard corresponds to the European EN 12 453 standard
- Operational reliability is optimum. The design satisfies the European EN 13 241-1 standard
- Cost-effective design for the entire aluminium gate leaf
- The maximum spacing for bars is 120 mm
- The materials and surfaces used also produce an appearance which remains attractive for a long time
- EntraLight™ can be easily combined with all our company's site protection systems
- Quick and rational on-site installation is possible since the gate is fully pre-assembled and its functions tested in the factory
- Short delivery times

“Everything from one source”

“Everything from one source” is our principle. Planning, manufacturing, installation and maintenance is our competence. GPP stands at your side as a strong and experienced partner.

Features

- Smooth and silent running
- Good levels of stability
- Time-saving installation thanks to high level of pre-fabrication
- Low-maintenance.
- Outstanding price and performance ratio
